

Dear {{voornaam}},

For the coming election and subsequent coalition formation process, Scientists for Future is calling on party leaders to prioritize **a fair and just tackling of the global climate crisis** and to publicly state that, as a party or coalition of parties there will be:

1. **no new fossil infrastructure and no new gas extraction** from the North Sea and below the Wadden Sea;
2. an **immediate end to the annual 40-46 billion euro fossil subsidies** to large polluters in The Netherlands.

We want to make a strong statement from Dutch academia and are asking you for your support to our letter, that you can **find and sign** [here](#). We also ask you to **share our letter with your academic network**, including colleagues in research institutes, in The Netherlands.

As the elections are approaching quickly, the deadline for signing is **Monday 20 October 20:00h**. On Tuesday 21 October we will send the letter with the list of supporting academics and researchers to the political party leaders.

With determined and grateful wishes and on behalf of Scientists for Future NL,
Marjan Smeulders

Upcoming events
